## COMPLIANCE ONLINE

### Delivering global non-life (P&C) insurance regulations and taxes at a glance

Axco Compliance Online supplies insurance professionals with key regulatory and tax compliance information for all major lines of non-life insurance business in over 170 territories across the globe.

Compliance Online has been developed to deliver business-critical insurance data in a timely and user-friendly way, allowing subscribers to customise and filter data according to their needs. Information can be viewed by territory or per topic, and up to three different lines of business can be compared simultaneously. Lines of business covered include property, directors' and officers' liability and workers' compensation, and regulatory topics range from taxes and compulsory insurances to non-admitted positions and policy conditions.

#### Key Benefits

1. Supplies business-critical information on key regulatory requirements for over 170 territories worldwide
2. Uses a Question & Answer structure, with topics compiled from clients' most frequently asked compliance questions
3. Offers a comprehensive, customisable compliance overview of multiple markets, with the facility to view line of business-specific regulation

# 04 COMPLIANCE ONLINE

## Time-saving efficiencies and concise, focused information

Compliance Online creates time-saving efficiencies by providing a single point of reference for regulatory and legislative requirements around the world. The database brings together the answers to insurance professionals' most frequently asked compliance questions and eliminates the need to search through and translate multiple sources of regulatory information from the original language.

Concise and focused data applicable to a particular class of business gives users the essential information relevant to their individual regulatory requirements and the Q&A structure helps subscribers to quickly and easily find information and compare compliance data across individual lines of business and multiple markets.

With Compliance Online, subscribers can customise the presentation of data by territory or by regulatory topic, viewing up to three lines of business at a time. Whilst these flexible display options facilitate market comparison, the reports' Q&A format maintains consistency and allows quick and direct access to readily comparable compliance information.

### Features of Compliance Online

- Export data to Excel
- Compare regulatory information side by side for multiple territories and multiple lines of business
- Follow a link to the full Axco Non-Life Insurance Market Report for a more comprehensive market overview
- Customise, download and print information

## Crucial compliance data

Compliance Online offers a crucial insight into local conditions through the delivery of essential compliance and tax information, including non-admitted positions, taxes and charges, and compulsory insurances. Axco's provision of data on policy language and currency, premium payment terms and premium currency, can help subscribers adhere to the policy issuance and premium payment conditions of the markets in which they operate.

Compliance Online delivers business-critical information on key regulatory and compliance topics, including:

- taxes, tariffs and charges; split by insured, insurer and reinsurer
- compulsory classes
- non-admitted positions
- premium reserves and premium collection
- local broker requirements
- policy language and currency

Axco aims to provide the most accurate, relevant and up-to-date insurance intelligence possible. Regular country visits and timely updates ensure that we present the most current regulatory and legislative information available, and subscribers can be confident of the reliability of Axco reporting. Compliance Online is prepared and maintained by our in-house team of research analysts and supported by the intelligence secured by Axco industry specialists visiting local supervisors, insurers, reinsurers and brokers in each of the markets that Axco covers.
