## CLINICAL TRIALS

An easy-to-use, focused overview of over 170 clinical trials environments worldwide

Axco's Clinical Trials insurance information draws on the work of our consultant writers and in-house team of research analysts to produce a unique overview of over 170 individual clinical trials environments worldwide. Information is set out market by market, using a dual delivery approach that allows subscribers to access data through Axco's Insight Compliance database as well as to download extended clinical trials reports.

Axco's established relationships with key information providers and regular visits to insurance markets around the world deliver a level of insight into the environments and issues surrounding this field that is unobtainable through desk-top research. With information sourced from contract research organisations, medical authorities, health ministries and ethics committees, Axco aims to ensure that subscribers are supplied with the most current data available on clinical trials across the globe. Focused and concise information is provided on the insurance aspects of these trials, including details of legislative requirements, regulatory considerations, insurance coverage and procedural information.

### Key Benefits

1. Gives quick and easy access to up-to-date market information
2. Facilitates assessment of the feasibility of over 170 markets worldwide
3. Supplies market-specific clinical trials compliance requirements, viewable alongside compliance data for all major lines of business

---

*"As the definitive source for the latest regulatory and legislative information, Axco provides insurance professionals with the necessary information to help navigate the unique insurance and risk management challenges of the global clinical trials market."*

## Time-saving efficiencies and enhanced productivity

Axco Clinical Trials eliminates the need to search through multiple and inconsistent sources of information, providing users with a single, concise, and reliable source of market data that both facilitates workflow and saves time. Clinical Trials combines the standardised Q&A structure of Insight Compliance with detailed market intelligence to offer a complete and comprehensive insight into the clinical trials insurance environments of over 170 territories around the globe.

### Features of Axco's Clinical Trials

- Export data to Excel
- Customise data to view compliance information for multiple lines of business, including clinical trials, simultaneously
- Display data by topic or territory and compare information to identify trends across markets
- Download the Clinical Trials PDF Report, containing further detail and explanatory text
- Follow a link to the full Axco Non-Life Insurance Market Report for a more comprehensive market overview

## Intelligence on emerging markets

Regular updates ensure that Axco Clinical Trials provides the most current intelligence available on both emerging and established markets. This information, including overall market trends and developments, can help subscribers to assess the feasibility of foreign markets, identify commercial opportunities, and develop marketing strategies in untapped locations.

In addition to market trends, detail is provided on regulatory considerations, current and projected legislation relevant to clinical trials, and the influence of government, ethics committees and medical authorities.

## Crucial compliance information

Axco Clinical Trials helps subscribers to identify the legislative requirements of any of the markets covered through the supply of essential compliance and tax information.

### Topics include:

- Non-Admitted Insurance Policies - are they allowed?
- Compulsory Insurances - is clinical trials insurance required by law?
- Limits of Indemnity - compulsory minimum limits
- Taxes - what taxes and charges need to be paid?

Using Insight Compliance, which has been developed to deliver business-critical data in a timely and user-friendly way, clinical trials information can be easily viewed in conjunction with compliance information for any of the other lines of non-life business covered, such as professional liability, casualty, and property. This database offers subscribers a comprehensive compliance overview of multiple markets that is adaptable to their needs and can help to develop and enhance business operations in the global market.

### Axco Clinical Trials provides information on:

- non-admitted positions
- taxes, tariffs and charges, split by insured, insurer and reinsurer
- retentions
- premium reserves
- dictates on policy language and currency
- compulsory local pools
- limits of indemnity and scope of cover
- insurance certificate and coverage conditions
- current and projected legislation
- regulatory considerations, including whether insurance is compulsory, and whether the insured is required to be a local entity
- rules on multi-year policies
- standard reporting periods
